

Burnout Prevention	77
What to Do If You Are Burned Out	77
Goal Setting as a Stress Reliever	77

Chapter 6: The Therapeutic Approach to the Patient with a Life-Threatening Illness 81

Life-Threatening Illness	82
Cultural Perspective on Life-Threatening Illness	82
Choices in Life-Threatening Illness	83
The Range of Psychological Suffering	85
The Therapeutic Response to the Patient with HIV/AIDS	85
The Therapeutic Response to the Patient with Cancer	86
The Therapeutic Response to the Patient with End-Stage Renal Disease	86
The Stages of Grief	87
Denial	87
Anger	87
Bargaining	87
Depression	87
Acceptance	87
The Challenge for the Medical Assistant	88

Unit 3: Responsible Medical Practice 92

Chapter 7: Legal Considerations 93

Sources of Law	95
Statutory Law	95
Common Law	95
Criminal Law	96
Civil Law	96
Administrative Law	96
Title VII of the Civil Rights Act	96
Federal Age Discrimination Act	97
Uniform Anatomical Gift Act	97
Regulation Z of the Consumer Protection Act	97
Occupational Safety and Health Act	97
Controlled Substances Act	97
Americans with Disabilities Act	98
Family and Medical Leave Act	98
Health Insurance Portability and Accountability Act	98
Contract Law	99
Termination of Contracts	100
Tort Law	101
Medical Practice Acts	101
Standard of Care	102
Informed Consent	103
Implied Consent	105
Consent and Legal Incompetence	105
Risk Management	105
Civil Litigation Process	106
Subpoenas	106
Discovery	106
Pretrial Conference	107
Trial	107

Statute of Limitations	107
Public Duties	107
Reportable Diseases/Injuries	107
Abuse	108
Good Samaritan Laws	109
Advance Directives	110
Living Wills/Advance Directives	110
Durable Power of Attorney for Health Care	110
Patient Self-Determination Act	110

Chapter 8: Ethical Considerations 120

Ethics	121
Principle-Centered Leadership	122
Five Ps of Ethical Power	123
Ethics Check Questions	123
Bioethics	123
Keys to the AAMA Code of Ethics	125
Ethical Guidelines for Health Care Providers	126
Advertising	126
Confidentiality	126
Medical Records	126
Professional Fees and Charges	127
Professional Rights and Responsibilities	127
Disaster Response	127
Treatment for a Culturally Diverse Clientele	127
Care of the Poor	127
Abuse	128
Bioethical Dilemmas	128
Allocation of Scarce Medical Resources	128
Abortion and Fetal Tissue Research	129
Genetic Engineering/Manipulation	130
Artificial Insemination/Surrogacy	130
In Vitro Fertilization	131
Dying and Death	131
HIV and AIDS	132

Chapter 9: Emergency Procedures and First Aid 137

Recognizing an Emergency	138
Responding to an Emergency	139
Primary Survey	140
Using the 911 or Emergency Medical Services System	140
Good Samaritan Laws	141
Blood, Body Fluids, and Disease Transmission	141
Preparing for an Emergency	142
The Medical Crash Tray or Cart	142
Common Emergencies	143
Shock	143
Wounds	144
Burns	146
Musculoskeletal Injuries	150
Heat- and Cold-Related Illnesses	151
Poisoning	153

Sudden Illness	154
Cerebral Vascular Accident	156
Heart Attack	157
Breathing Emergencies and Cardiac Arrest	157
Rescue Breathing	157
Cardiopulmonary Resuscitation	157
Safety and Emergency Practices	159

SECTION II: ADMINISTRATIVE PROCEDURES 167

Unit 4: Integrated Administrative Procedures 168

Chapter 10: Creating the Facility Environment 169

The Reception Area	171
Office Design and Environment	173
Americans with Disabilities Act	174
Safety	174
The Administrative Medical Assistant's Role	175
Opening the Facility	176
Closing the Facility	176
The Future Environment for Ambulatory Care	176

Chapter 11: Computers in the Ambulatory Care Setting 181

The Computer System	183
Basic System	183
Types of Computer Systems	183
Components of a Computer System	185
Hardware	185
Software	186
Documentation	187
Hardware and Software Compatibility	187
Computer Networks	187
Systems Security	188
Computer Maintenance by Office Personnel	191
Use of Computers in the Medical Office	191
General Office Procedures	191
Electronic Health Records	191
Clinical and Laboratory Applications	192
Portable Computers in the Medical Office	192
Design Considerations for a Computerized Medical Office	194
Software Selection	194
Hardware Selection	194
Ergonomics	195
Scheduling the Changeover	197
Patient Confidentiality in the Computerized Medical Office	197

HIPAA Standards for Safeguarding Protected Health Information (PHI)	198		
Professionalism in the Computerized Medical Office	198		
Chapter 12: Telecommunications	206		
Telecommunications in the Electronic Health Record Environment	208		
Basic Telephone Techniques	208		
Telephone Personality	209		
Professional Telephone Etiquette	210		
Answering Incoming Calls	211		
Routing Calls in the Medical Office	213		
Types of Calls the Medical Assistant Can Take	213		
Types of Calls Referred to the Provider	214		
Special Consideration Calls	215		
Telephone Documentation	217		
Using Telephone Directories	217		
Placing Outgoing Calls	218		
Placing Long-Distance Calls	218		
Legal and Ethical Considerations	219		
HIPAA Guidelines for Telephone Communications	220		
Americans with Disabilities Act (ADA)	221		
Telephone Technology	221		
Automated Routing Units	221		
Answering Services and Machines	222		
Voice over Internet Protocol (VoIP) Telecommunications	222		
Facsimile (Fax) Machines	223		
Electronic Mail (Email)	224		
Clinical Email	226		
Interactive Videoconferencing	227		
Cellular Service	227		
Paging Systems	227		
Professionalism in Telecommunications	228		
Chapter 13: Patient Scheduling	239		
Tailoring the Scheduling System	241		
Scheduling Styles	241		
Open Hours	243		
Double Booking	243		
Clustering	243		
Wave Scheduling	243		
Modified Wave Scheduling	243		
Stream Scheduling	244		
Practice-Based Scheduling	244		
Analyzing Patient Flow	244		
Waiting Time	245		
Legal Issues	245		
Interpersonal Skills	245		
Guidelines for Scheduling Appointments	246		
Screening Calls	246		
Referral Appointments	246		
Recording Information	247		
Appointment Matrix	247		
Telephone Appointments	248		
Patient Check-In	248		
Patient Cancellation and Appointment Changes	248		
Reminder Systems	249		
Scheduling Pharmaceutical Representatives	250		
Scheduling Software and Materials	250		
Appointment Schedule	250		
Computer Scheduling Software	250		
Inpatient and Outpatient Admissions Procedures	251		
Chapter 14: Medical Records Management	267		
The Purpose of Medical Records	269		
Ownership of Medical Records	269		
Authorization to Release Information	270		
Manual or Electronic Medical Records	270		
The Importance of Accurate Medical Records	271		
Creating Paper and Electronic Charts	271		
Correcting Medical Records	271		
Types of Medical Records	272		
Problem-Oriented Medical Record	272		
Source-Oriented Medical Record	273		
Strict Chronological Arrangement	273		
Equipment and Supplies	273		
Vertical Files	273		
Open-Shelf Lateral Files	274		
Movable File Units	274		
File Folders	274		
Identification Labels	274		
Guides and Positions	274		
Out Guides	275		
Basic Rules for Filing	275		
Indexing Units	275		
Filing Patient Charts	276		
Filing Identical Names	277		
Steps for Filing Medical Documentation in Patient Files	277		
Inspect	277		
Index	277		
Code	277		
Sort	277		
File	277		
Filing Techniques and Common Filing Systems	277		
Color Coding	278		
Alphabetic Filing	280		
Numeric Filing	280		
Subject Filing	281		
Choosing a Filing System	282		
Filing Procedures	282		
Cross-Referencing	282		
Tickler Files	283		
Release Marks	284		
Checkout System	284		
Locating Missing Files or Data	284		
Filing Chart Data	285		
Retention and Purging	285		
Correspondence	286		
Filing Procedures for Correspondence	286		
Electronic Medical Records	287		
Archival Storage	288		
Transfer of Data	288		
Confidentiality	288		
Chapter 15: Written Communications	300		
Composing Correspondence	301		
Writing Tips	302		
Spelling	302		
Proofreading	303		
Components of a Business Letter	304		
Date Line	304		
Inside Address	304		
Salutation	306		
Subject Line	306		
Body of Letter	306		
Complimentary Closing	306		
Keyed Signature	307		
Reference Initials	307		
Enclosure Notation	307		
Copy Notation	307		
Postscripts	307		
Continuation Page Heading	307		
Letter Styles	307		
Full Block	308		
Modified Block	308		
Simplified	308		
Supplies for Written Communication	308		
Letterhead	309		
Second Sheets	309		
Printing Multipage Business Letters	309		
Envelopes	310		
Mail Merge	312		
Other Types of Correspondence	312		
Memoranda	312		
Meeting Agendas	313		
Meeting Minutes	313		
Processing Incoming and Outgoing Mail	314		
Incoming Mail and Shipments	314		
Outgoing Mail and Shipments	315		
Postal Classes	315		
Formats for Efficient Mail Processing	317		
International Mail	317		
Legal and Ethical Issues	317		
Chapter 16: Medical Documents	328		
The Changing Role of Medical Transcription	329		
Electronic Medical Records	329		
Outsourcing	330		
Voice Recognition Software	331		
Medical Transcriptionist as Editor	331		
Authentication	332		
Confidentiality and Legal Issues	333		
Health Insurance Portability and Accountability Act Regulations	333		

Protocols	333
Types of Medical Documents	334
Chart Notes and Progress Notes	334
History and Physical Examination	
Reports	335
Radiology and Imaging Reports	335
Operative Reports	336
Pathology Reports	336
Consultation	337
Discharge Summaries	337
Autopsy Reports	337
Correspondence	338
Turnaround Time and Productivity	338
Medical Transcription as a Career	340
Professionalism Related to Medical	
Transcription	340

Unit 5: Managing Facility Finances 345

Chapter 17: Medical Insurance 346

Understanding the Role of Health Insurance	348
Medical Insurance Terminology	348
Terminology Specific to Insurance	
Policies	348
Terminology Specific to Billing	
Insurance Carriers	351
Types of Medical Insurance Coverage	351
Traditional Insurance	351
Managed Care Insurance	353
The Impact of Managed Care	354
Medicare Insurance	355
Medicare Supplemental Insurance	356
Medicaid Insurance	357
TRICARE	357
Civilian Health and Medical	
Program of the Veterans	
Administration	358
Workers' Compensation Insurance	358
Self-Insurance	358
Medical Tourism Insurance	358
Screening for Insurance	358
Referrals and Authorizations	359
Determining Fee Schedules	360
Usual, Customary, and Reasonable	
Fees	360
Resource-Based Relative Value Scale	
(RBRVS)	361
Hospital Inpatient Prospective Payment	
System (IPPS)	361
Hospital Outpatient Prospective	
Payment System (OPPS)	361
Capitation	362
Legal and Ethical Issues	363
HIPAA Implications	363
Insurance Fraud and Abuse	364
Professional Careers in Insurance	364

Chapter 18: Medical Insurance Coding 371

Insurance Coding Systems Overview	372
Coding of Medical Procedures	373
CPT Manual Organization and Use	373
Modifiers	375
Healthcare Common Procedure Coding System (HCPCS)	376
Coding of Medical Diagnoses	376
ICD-9-CM Resource Manual	
Organization and Use	376
External Cause Codes (E Codes)	376
Supplementary Health Factor Codes	
(V Codes)	377
Morphology Codes (M Codes)	377
Code References	377
Coding Accuracy	377
Coding the Claim Form	378
Third-Party Guidelines	381
Completing the CMS-1500 (08-05)	382
Uniform Bill 04 Form	383
Using the Computer to	
Complete Forms	383
Common Errors in Completing	
Claim Forms	386
Benefits of Submitting Claims Electronically	386
Managing the Claims Process	386
Documentation of Referrals	386
Point-of-Service Device	386
Maintaining a Claims Registry	387
Following Up on Claims	387
The Insurance Carrier's Role	388
Explanation of Benefits	388
Legal and Ethical Issues	388
Compliance Programs	388

Chapter 19: Daily Financial Practices 400

Patient Fees	401
Helping Patients Who Cannot Pay	401
Determining Patient Fees	402
Discussion of Fees	402
Adjustment of Fees	402
Credit Arrangements	403
Payment Planning	403
The Bookkeeping Function	403
Managing Patient Accounts	404
Recording Patient Transactions	405
Encounter Form	405
Patient Account or Ledger	406
Day Sheet	408
Receipts	408
Month-End Activities	409
Computerized Patient Accounts	409
Banking Procedures	409
Online Banking	410
Types of Accounts	411
Types of Checks	412
Depositing Checks	412

Cash on Hand	413
Accepting Checks	413
Lost or Stolen Checks	414
Writing and Recording Checks	414
Reconciling a Bank Statement	414
Purchasing Supplies and Equipment	415
Preparing a Purchase Order	415
Verifying Goods Received	417
Petty Cash	417
Establishing a Petty Cash Fund	417
Tracking, Balancing, and Replenishing	
Petty Cash	417

Chapter 20: Billing and Collections 435

Billing Procedures	436
Credit and Collection Policies	437
Payment at Time of Service	437
Truth-in-Lending Act	438
Components of a Complete Statement	438
Computerized Statements	440
Monthly and Cycle Billing	440
Monthly Billing	441
Cycle Billing	441
Past-Due Accounts	441
Collection Process	441
Collection Ratio	441
Accounts Receivable Ratio	442
Aging Accounts	442
Computerized Aging	442
Collection Techniques	443
Billing Insurance Carriers	443
Telephone Collections	444
Collection Letters	444
Use of an Outside Collection Agency	444
Use of Small Claims Court	446
Special Collection Situations	447
Bankruptcy	447
Estates	447
Tracing "Skips"	447
Statute of Limitations	447
Maintain a Professional Attitude	448

Chapter 21: Accounting Practices 458

Bookkeeping and Accounting Systems	459
Single-Entry System	459
Pegboard System	460
Double-Entry System	460
Total Practice Management System	460
Computer and Billing Service	
Bureaus	461
Day-End Summary	462
Tips for Finding Errors	462
Accounts Receivable Trial Balance	462
Accounts Payable	463
Disbursement Records	463
The Accounting Function	463
Cost Analysis	464

Fixed Costs	464
Variable Costs	464
Financial Records	464
Income Statement	464
Balance Sheet	464
Useful Financial Data	464
Accounts Receivable Ratio	466
Collection Ratio	467
Cost Ratio	467
Legal and Ethical Guidelines	467
Bonding	467
Payroll	468

SECTION III: CLINICAL PROCEDURES 473

Unit 6: Integrated Clinical Procedures 474

Chapter 22: Infection Control and Medical Asepsis 475

Impact of Infectious Diseases	478
The Process of Infection	478
Growth Requirements for Microorganisms	479
Chain of Infection	479
Infectious Agents	479
Reservoir	481
Portal of Exit	484
Means of Transmission	486
Portal of Entry	486
Susceptible Host	486
The Body's Defense Mechanisms for Fighting Infection and Disease	487
The Body's Natural Barriers	487
Inflammatory Response	487
The Immune System and Immunity	487
Stages of Infectious Diseases	495
Incubation Stage	495
Prodromal Stage	495
Acute Stage	495
Declining Stage	496
Convalescent Stage	496
Disease Transmission	496
Human Immunodeficiency Virus and Hepatitis B and C	497
HIV and AIDS	497
Acute Viral Hepatitis Diseases	497
Reporting Infectious Disease	501
Standard Precautions	501
Transmission-Based Precautions	502
Blood and Body Fluids	502
Personal Protective Equipment	507
Needlestick	507
Disposal of Infectious Waste	508
Federal Organizations and Infection Control	508
OSHA Regulations	510

The Bloodborne Pathogen Standard	510
OSHA Regulations and Students	517
Avoiding Exposure to Bloodborne Pathogens	517
Principles of Infection Control	520
Medical Asepsis	520
Hand Washing	521
Sanitization	522
Disinfection	523
Bioterrorism	524

Chapter 23: The Patient History and Documentation 537

The Purpose of the Medical History	539
Preparing for the Patient	539
A Cross-Cultural Model	540
Patient Information Forms	540
Demographic Data Form	540
Financial Information Form	540
Privacy Information Form	542
Release of Information Form	542
Medical History Form	543
Computerized Health History	543
The Patient Intake Interview	543
Interacting with the Patient	543
Displaying Cultural Awareness	544
Being Sensitive to Patient Needs	545
Approaching Sensitive Topics	546
Communication across the Life Span	546
The Medical Health History	547
SOAP/SOAPER and CHEDDAR	547
Chief Complaint	548
Present Illness	548
Medical History	549
Family History	549
Social History	549
Review of Systems (ROS)	550
The Patient Record and Its Importance	550
HIPAA Compliance	552
Contents of Medical Records	552
Continuity of Care Record	553
Methods of Charting/Documentation	553
Source-Oriented Medical Records	553
Problem-Oriented Medical Records	553
Electronic Medical Records (EMR)	554
Rules of Charting	556
Abbreviations Used in Charting	556
Chart Organization	558

Chapter 24: Vital Signs and Measurements 563

The Importance of Accuracy	564
Temperature	565
Terms Used to Describe Body Temperature	566
Phase Out of Mercury Thermometers and Other Mercury-Containing Equipment	566
Types of Thermometers	568
Measuring Temperature	570
Recording Temperature	571

Cleaning and Storage of Thermometers	571
Pulse	571
Pulse Sites	571
Measuring and Evaluating a Pulse	572
Normal Pulse Rates	573
Pulse Abnormalities	573
Recording Pulse Rates	573
Respiration	573
Respiration Rate	574
Abnormalities	574
Blood Pressure	575
Equipment for Measuring Blood Pressure	575
Measuring Blood Pressure	578
Recording Blood Pressure Measurement	579
Normal Blood Pressure Readings	579
Blood Pressure Abnormalities	580
Height and Weight	581
Height	581
Weight	582
Significance of Weight	583
Measuring Chest Circumference	583

Chapter 25: The Physical Examination 599

Methods of Examination	600
Observation or Inspection	601
Palpation	601
Percussion	601
Auscultation	602
Mensuration	602
Manipulation	602
Positioning and Draping	602
Examination Positions	603
Equipment and Supplies for the Physical Examination	605
Basic Components of a Physical Examination	607
Patient Appearance	607
Gait	607
Stature	608
Posture	608
Body Movements	608
Speech	608
Breath Odors	608
Nutrition	608
Skin and Appendages	608
The Physical Examination Sequence	609
Head	609
Eyes	609
Ears	612
Nose	613
Mouth and Throat	613
Neck	613
Chest	613
Breast	613
Abdomen	613
Genitals	613
Rectum	614
Reflexes	614
After the Examination	614

Unit 7: Assisting with Specialty Examinations and Procedures **620**

Chapter 26: Obstetrics and Gynecology **621**

Obstetrics 623
Initial Prenatal Visit 623
Subsequent or Return Prenatal Visits 627
Disorders of Pregnancy 632
Parturition 635
Postpartum Period 635
Gynecology 636
The Gynecologic Examination 641
Gynecologic Diseases and Conditions 650
Other Diagnostic Tests and Treatments for Reproductive System Diseases 653
Complementary Therapy in Obstetrics and Gynecology 660

Chapter 27: Pediatrics **671**

What Is Pediatrics? 672
Preparation of Vaccines for Administration 673
Recommended Vaccination Schedule 681
Considerations for Vaccine Administration 681
Giving Injections to Pediatric Patients 684
Theories of Growth and Development 687
Newborns 688
Infants 688
Toddlers 688
Preschoolers 690
School-Aged Children 690
Adolescents 691
Growth Patterns 692
Measuring the Infant or Child 692
Length and Weight Measurements 692
Infant Holds and Positions 692
Height and Weight Measuring Devices 695
Measuring Head Circumference 696
Measuring Chest Circumference 696
Infant/Child Failure to Thrive 697
Pediatric Vital Signs 697
Temperature 698
Pulse 698
Respirations 699
Blood Pressure 699
Collecting a Urine Specimen from an Infant 699
Screening Infants for Hearing Impairment 700
Screening Infant and Child Visual Acuity 700
Common Disorders and Diseases 700
Otitis Media 701
The Common Cold 701
Tonsillitis 702
Pediculosis 702
Asthma 702

Croup 702
Pertussis (Whooping Cough) 702
Respiratory Syncytial Virus 703
Attention Deficit Hyperactivity Disorder 703
Child Abuse 703
Male Circumcision 704

Chapter 28: Male Reproductive System **716**

Testicular Self-Examination 719
Disorders of the Male Reproductive System 719
Testicular Cancer 719
Epididymitis 719
Prostatitis 720
Prostate Cancer 720
Benign Prostatic Hypertrophy 721
Sexually Transmitted Diseases 722
Balanitis 722
Infertility 722
Erectile Dysfunction 723
Assisting with the Male Reproductive Examination 724
Diagnostic Tests and Procedures 725
Vasectomy 725
Semen Analysis 725
Urodynamic Studies 725

Chapter 29: Gerontology **729**

Societal Bias 730
Facts about Aging 731
Physiologic Changes 731
Senses 732
Integumentary System 733
Nervous System 733
Musculoskeletal System 733
Respiratory System 734
Cardiovascular System 734
Gastrointestinal System 735
Urinary System 735
Reproductive System 735
Prevention of Complications 735
Psychological Changes 736
The Medical Assistant and the Geriatric Patient 736
Memory-Impaired Older Adults 737
Visually Impaired Older Adults 737
Hearing-Impaired Older Adults 737
Elder Abuse 738
Healthy and Successful Aging 739

Chapter 30: Examinations and Procedures of Body Systems **743**

Urinary System 745
Signs and Symptoms of Urinary Conditions and Disorders 745
Diagnostic Tests 745
Urinary Catheterization 748
Digestive System 750

Signs and Symptoms of Digestive Conditions and Disorders 750
Diagnostic Tests 756
Bariatrics 760
Sensory System 763
The Eye 763
The Ear 769
The Nose 772
Respiratory System 772
Signs and Symptoms of Respiratory Conditions and Disorders 772
Diagnostic Tests 773
Spirometry 773
Peak Expiratory Flow Rates 777
Pulse Oximetry 777
Inhalers 778
Musculoskeletal System 778
Fractures, Casting, and Cast Removal 780
Neurologic System 784
Components of a Neurologic Screening 787
Circulatory System 787
Blood and Lymph System 789
Integumentary System 790
Allergy Skin Testing 792

Unit 8: Advanced Techniques and Procedures **828**

Chapter 31: Assisting with Office/Ambulatory Surgery **829**

Surgical Asepsis and Sterilization 831
Hand Cleansing (Hand Hygiene) for Medical and Surgical Asepsis 831
Sterile Principles 832
Methods of Sterilization 833
Gas Sterilization 833
Dry Heat Sterilization 833
Chemical (“Cold”) Sterilization 833
Steam Sterilization (Autoclave) 834
Common Surgical Procedures Performed in Providers’ Offices and Clinics 838
Additional Surgical Methods 839
Electrosurgery 839
Cryosurgery 839
Laser Surgery 840
Suture Materials and Supplies 840
Suture/Ligature 840
Suture Needles 841
Staples 841
Staple Removal 841
Instruments 842
Structural Features 842
Categories and Uses 842
Care of Instruments 849
Supplies and Equipment 852
Drapes 853
Sponges and Wicks 853
Solutions/Creams/Ointments 854

Dressings and Bandages	854
Anesthetics	854
Patient Care and Preparation	856
Patient Preparation and Education	856
Informed Consent	857
Medical Assisting Considerations	857
Postoperative Instructions	857
Wounds, Wound Care, and the Healing Process	858
Basic Surgery Setup	859
Basic Rules and Concepts for Setup of Surgical Trays	860
Surgery Process	860
Preparation for Surgery	860
Using Dry Sterile Transfer Forceps	862

Chapter 32: Diagnostic Imaging 895

Radiation Safety	896
X-Ray Machine	897
Contrast Media	898
Patient Preparation	898
Positioning the Patient	900
Fluoroscopy	900
Bone Densitometry	900
Diagnostic Imaging	900
Positron Emission Tomography (PET)	900
Computerized Tomography (CT)	903
Magnetic Resonance Imaging (MRI)	904
X-Rays (Flat Plates)	905
Ultrasonography	905
Mammography	907
Filing Films and Reports	907
Radiation Therapy	907
Nuclear Medicine	908

Chapter 33: Rehabilitation and Therapeutic Modalities 911

The Role of the Medical Assistant in Rehabilitation	913
Principles of Body Mechanics	914
Posture	914
Using the Body Safely and Effectively	914
Lifting Techniques	915
Transferring Patients	915
Assisting Patients to Ambulate	917
Assistive Devices	917
Walkers	917
Crutches	919
Canes	922
Wheelchairs	923
Therapeutic Exercises	924
Range of Motion	924
Muscle Testing	926
Types of Therapeutic Exercise	926
Electromyography	927
Electrostimulation of Muscle	927
Therapeutic Modalities	927
Heat and Cold	927
Moist and Dry Heat	928

Moist and Dry Cold	929
Ultrasound	930
Massage Therapy	931

Chapter 34: Nutrition in Health and Disease 944

Nutrition and Digestion	945
Types of Nutrients	946
Energy Nutrients (Organic)	946
Other Nutrients (Inorganic)	952
Reading Food Labels	960
Items on the Nutrition Label	960
Comparing Labels	961
Nutrition at Various Stages of Life	961
Pregnancy and Lactation	962
Breast-Feeding	963

Emergency Drugs and Supplies	998
Bioterrorism	999
Drug Abuse	999

Chapter 36: Calculation of Medication Dosage and Medication Administration 1010

Legal and Ethical Implications of Medication Administration	1011
Ethical Considerations	1012
The Medication Order	1012
The Prescription	1012
Drug Dosage	1015
Age	1015
Weight	1015
Sex	1015
Other Factors	1016
The Medication Label	1016
Calculation of Drug Dosages	1017
Understanding Ratio	1017
Understanding Proportion	1018
Weights and Measures	1019
Medications Measured in Units	1021
How to Calculate Unit Dosages	1021
Insulin	1022
Diabetes	1022
Calculating Adult Dosages	1024
The Proportional Method	1024
The Formula Method	1025
Calculating Children's Dosages	1025
Body Surface Area	1025
Kilogram of Body Weight	1026
Administration of Medications	1027
The "Six Rights" of Proper Drug Administration	1028
Medication Errors	1029
Patient Assessment	1029
Administration of Oral Medications	1031
Equipment and Supplies for Oral Medications	1031
Administration of Parenteral Medications	1032
Hazards Associated with Parenteral Medications	1032
Reasons for Parenteral Route Selection	1032
Parenteral Equipment and Supplies	1033
Principles of Intravenous Therapy	1037
Site Selection and Injection Angle	1039
Marking the Correct Site for Intramuscular Injection	1039
Basic Guidelines for Administration of Injections	1043
Z-Track Method of Intramuscular Injection	1044
Administration of Allergenic Extracts	1044
Administration of Inhaled Medications	1045
Implications for Patient Care	1045
Administration of Oxygen	1045

Chapter 37: Electrocardiography 1066

Anatomy of the Heart	1068
Electrical Conduction System of the Heart	1068
The Cardiac Cycle and the ECG Cycle	1069
Calculation of Heart Rate on ECG	
Graph Paper	1069
Types of Electrocardiographs	1071
Single-Channel Electrocardiograph	1071
Multichannel Electrocardiograph	1073
Automatic Electrocardiograph Machines	1073
Electrocardiograph Telephone Transmissions	1074
Facsimile Electrocardiograph	1074
Interpretive Electrocardiograph	1074
ECG Equipment	1074
Electrocardiograph Paper	1074
Electrolyte	1074
Sensors or Electrodes	1074
Lead Wires	1074
Electrocardiograph Machine	1075
Care of Equipment	1075
Lead Coding	1075
The Electrocardiograph and Sensor Placement	1075
Standard Limb or Bipolar Leads	1075
Augmented Leads	1075
Chest Leads or Precordial Leads	1076
Standardization and Adjustment of the Electrocardiograph	1078
Standard Resting Electrocardiography	1079
Mounting the ECG Tracing	1079
Interference or Artifacts	1079
Somatic Tremor Artifacts	1079
AC Interference	1079
Wandering Baseline Artifacts	1080
Interrupted Baseline Artifacts	1080
Patients with Unique Problems	1080
Myocardial Infarctions (Heart Attacks)	1081
Cardiac Arrhythmias	1082
Atrial Arrhythmias	1082
Ventricular Arrhythmias	1083
Defibrillation	1085
Other Cardiac Diagnostic Tests	1085
Holter Monitor (Portable Ambulatory Electrocardiograph)	1085
Loop ECG	1087
Treadmill Stress Test or Exercise Tolerance ECG	1087
Thallium Stress Test	1088
Echocardiography/Ultrasonography	1088
Cardiac Procedures	1089
Procedures for Heart Disease	1089
Procedures for Arrhythmias	1089

Unit 9: Laboratory Procedures 1097

Chapter 38: Safety and Regulatory Guidelines in the Medical Laboratory 1098

Clinical Laboratory Improvement Amendments of 1988	1100
The Intention of CLIA '88	1101
General Program Description	1101
Categories of Testing	1102
Contents of the Law	1102
Criteria for PPMP	1104
Criteria for CLIA Waived Tests	1104
CLIA '88 Regulation for Quality Control in Automated Hematology	1105
Aftermath of CLIA '88	1105
Impact of CLIA on Medical Assistants	1106
Where to Find More Information Regarding CLIA '88	1106
OSHA Regulations	1106
The Standard for Occupational Exposure to Hazardous Chemicals in the Laboratory	1107
Chemical Hygiene Plan	1107
OSHA Regulations and Students	1112
Avoiding Exposure to Chemicals	1112
Cumulative Trauma Disorders	1114

Chapter 39: Introduction to the Medical Laboratory 1117

The Laboratory	1119
Purposes of Laboratory Testing	1119
Types of Laboratories	1120
Laboratory Personnel	1121
Laboratory Departments	1121
Panels of Laboratory Tests	1126
Billing for Laboratory Service	1126
Quality Controls/Assurances in the Laboratory	1126
Control Tests	1128
Proficiency Testing	1128
Preventative Maintenance	1128
Instrument Validations	1128
The Medical Assistant's Role	1128
Laboratory Requisitions and Reports	1128
Specimen Collection	1132
Proper Procurement, Storage, and Handling	1132
Processing and Sending Specimens to a Laboratory	1133
Microscopes	1134
Types of Microscopes	1134
How to Use a Microscope	1135
How to Care for a Microscope	1136

Chapter 40: Phlebotomy: Venipuncture and Capillary Puncture 1141

Why Collect Blood?	1143
The Medical Assistant's Role in Phlebotomy	1143
Anatomy and Physiology of the Circulatory System	1143
Blood Collection	1144
Plasma and Whole-Blood Collection	1145
Collection of Blood Specimens	1146
Venipuncture Equipment	1147
Syringes and Needles	1147
Safety Needles and Blood Collection Systems	1149
Vacuum Tubes and Adapters/ Holders	1149
Anticoagulants, Additives, and Gels	1150
Order of Draw	1152
Tourniquets	1153
Specimen Collection Trays	1154
Venipuncture Technique	1154
Approaching the Patient	1155
Preparing Supplies and Greeting the Patient	1155
Patient and Specimen Identification	1155
Positioning the Patient	1156
Selecting the Appropriate Venipuncture Site	1156
Applying the Tourniquet	1157
Performing a Safe Venipuncture	1157
Specimen Collection	1159
The Syringe Technique	1159
Vacuum Tube Specimen Collection	1160
Butterfly Needle Collection System	1161
Blood Cultures	1162
Patient Reactions	1162
The Unsuccessful Venipuncture	1162
Criteria for Rejection of a Specimen	1163
Factors Affecting Laboratory Values	1163
Capillary Puncture	1166
Composition of Capillary Blood	1166
Capillary Puncture Sites	1166
Preparing the Capillary Puncture Site	1166
Performing the Puncture	1166
Collecting the Blood Sample	1167

Chapter 41: Hematology 1189

Hematologic Tests	1192
Hemoglobin and Hematocrit Tests	1193
Hemoglobin	1193
Hematocrit	1194
White and Red Blood Cell Counts	1196
White Blood Cells and Differential	1196
Red Blood Cells	1199
Platelets	1199
Erythrocyte Indices	1199

Understanding RBC Indices	1200	Specific Collection Requirements for Cultures	1255	Fasting Blood Glucose	1287
Using Erythrocyte Indices to Diagnose	1200	Microscopic Examination of Bacteria	1257	Two-Hour Postprandial Blood Glucose	1288
Erythrocyte Sedimentation Rates (ESR or SED Rate)	1200	Bacterial Shapes	1258	Glucose Tolerance Test	1289
Wintrobe Method	1201	Dyes (Stains)	1258	Automated Methods of Glucose Analysis	1289
Westergren Method	1201	Simple Stain	1259	Testing Panels	1290
Using the ESR to Screen	1202	Differential Stain	1259	Glycosylated Hemoglobin	1290
C-Reactive Proteins	1202	Acid-Fast Stain	1259	Cholesterol and Lipids	1292
Coagulation Studies	1203	Other Techniques	1260	The Chemistry of Cholesterol	1292
Automated Hematology	1203	Potassium Hydroxide Preparation	1261	Functions of Cholesterol	1292
Chapter 42: Urinalysis	1213	Culture Media	1261	Lipoproteins and Cholesterol Transport	1293
Urine Formation	1214	Media Classification	1262	Triglycerides	1294
Filtration	1214	Microbiology Culture	1262	Blood Chemistry Tests	1294
Reabsorption	1215	Inoculating the Media	1262	Alanine Aminotransferase (ALT)	1294
Secretion	1215	Other Types of Streaking	1263	Albumin	1294
Urine Composition	1216	Primary Culture	1264	Alkaline Phosphatase (ALP)	1295
Safety	1216	Subculture	1264	Aspartate Aminotransferase (AST)	1295
Quality Control	1216	Rapid Identification Systems	1264	Bilirubin, Total and Direct	1295
Clinical Laboratory Improvement Amendments of 1988 (CLIA '88)	1217	<i>Streptococcus</i> Screening (Rapid Strep Testing)	1264	Blood Urea Nitrogen Test	1295
Urine Containers	1217	Sensitivity Testing	1265	Calcium	1295
Urine Collection	1218	Parasitology	1266	Chloride	1295
Urine Specimen Types	1218	Examination Methods	1266	Carbon Dioxide (CO ₂)	1296
Collection Methods	1219	Specimen Collection	1266	Creatinine	1296
Examination of Urine	1219	Common Parasites	1266	Gamma Glutamyltransferase (GGT)	1296
Physical Examination of Urine	1221	Mycology	1268	Lactate Dehydrogenase (LDH)	1296
Chemical Examination of Urine	1223	Chapter 44: Specialty Laboratory Tests	1275	Phosphorus (Phosphate)	1296
Microscopic Examination of Urine Sediment	1227	Urine Pregnancy Tests	1277	Potassium (K)	1296
Urinalysis Report	1230	Commercial/Home Urine Pregnancy Tests	1277	Sodium	1296
Drug Screening	1231	Testing Methods	1278	Total Protein	1296
Chapter 43: Basic Microbiology	1246	Slide Test or Agglutination Inhibition Test	1278	Uric Acid	1296
The Medical Assistant's Role in the Microbiology Laboratory	1247	Enzyme Immunoassay Test	1278	SECTION IV: PROFESSIONAL PROCEDURES	1309
Microbiology	1249	Infectious Mononucleosis	1278	Unit 10: Office and Human Resources Management	1310
Classification	1249	Transmission of EBV	1279	Chapter 45: The Medical Assistant as Office Manager	1311
Nomenclature	1249	Symptoms of IM	1279	The Medical Assistant as Office Manager	1313
Cell Structure	1250	Treatment of IM	1279	Qualities of a Manager	1313
Equipment	1250	Diagnosis of IM	1279	Office Manager Attitude	1315
Autoclave	1250	CLIA Waived IM Tests	1279	Professionalism	1315
Microscope	1250	Prothrombin Time/ProTime/INR	1279	Management Styles	1315
Safety Hood	1251	Blood Typing	1280	Authoritarian Style	1316
Incubator	1251	ABO Blood Typing	1280	Participatory Style	1316
Anaerobic Equipment	1251	Rh Blood Typing	1280	Management by Walking Around	1316
Inoculating Equipment	1251	Semen Analysis	1282	Risk Management	1316
Incinerator	1252	Semen Composition	1282	Importance of Teamwork	1317
Media	1252	Altering Factors in Semen Analysis	1282	Getting the Team Started	1317
Refrigerator	1252	Phenylketonuria Test	1282	Using a Team to Solve a Problem	1318
Safety when Handling Microbiology Specimens	1253	Blood Testing for PKU	1283	Planning and Implementing a Solution	1318
Personal Protective Equipment	1253	Tuberculosis	1284		
Work Area	1253	Cause of TB	1284		
Specimen Handling	1253	Resistance in Mycobacteria	1284		
Disposal of Waste and Spills	1253	Transmission of Infectious TB	1285		
Quality Control	1254	Diagnosis of TB	1285		
Collection Procedures	1254	Screening for TB: Skin Testing	1285		
		The Mantoux Test	1286		
		Blood Glucose	1287

List of Procedures

- | | | | | | |
|------|---|------|--|-------|---|
| 4-1 | Identifying Community Resources | 14-3 | Correcting a Paper Medical Record | 19-6 | Processing Credit Balances and Refunds Using Medical Office Simulation Software (MOSS) |
| 9-1 | Control of Bleeding | 14-4 | Correcting an Electronic Medical Record | 19-7 | Preparing a Deposit |
| 9-2 | Applying an Arm Splint | 14-5 | Steps for Manual Filing with an Alphabetic System | 19-8 | Recording a Nonsufficient Funds Check in a Manual System |
| 11-1 | Booting Up and Shutting Down the Computer | 14-6 | Steps for Manual Filing with a Numeric System | 19-9 | Writing a Check |
| 11-2 | Software Installation | 14-7 | Steps for Manual Filing with a Subject Filing System | 19-10 | Reconciling a Bank Statement |
| 11-3 | Hardware Installation | 15-1 | Preparing and Composing Business Correspondence Using All Components (Computerized Approach) | 19-11 | Establishing and Maintaining a Petty Cash Fund |
| 12-1 | Answering and Screening Incoming Calls | 15-2 | Addressing Envelopes According to United States Postal Regulations | 20-1 | Explaining Fees in the First Telephone Interview |
| 12-2 | Transferring a Call | 15-3 | Folding Letters for Standard Envelopes | 20-2 | Prepare Itemized Patient Accounts for Billing in a Manual System |
| 12-3 | Taking a Telephone Message | 15-4 | Creating a Mass Mailing Using Mail Merge | 20-3 | Identify Accounts Receivable Using Medical Office Simulation Software (MOSS) |
| 12-4 | Calling a Pharmacy to Refill an Authorized Prescription | 15-5 | Preparing Outgoing Mail According to United States Postal Regulations | 20-4 | Preparing Itemized Patient Accounts for Billing Using Medical Office Simulation Software (MOSS) |
| 12-5 | Handling Problem Calls | 17-1 | Applying Managed Care Policies and Procedures | 20-5 | Post/Record Collection Agency Adjustments in a Manual System |
| 12-6 | Placing Outgoing Calls | 17-2 | Screening for Insurance | 20-6 | Post/Record Adjustments Using Medical Office Simulation Software (MOSS) |
| 12-7 | Recording a Telephone Message on an Answering Device or Voice Mail System | 17-3 | Obtaining Referrals and Authorizations | 21-1 | Preparing Accounts Receivable Trial Balance in a Manual System |
| 12-8 | Preparing, Sending, and Receiving a Fax | 17-4 | Computing the Medicare Fee Schedule | 21-2 | Preparing Accounts Receivable Trial Balance Using Medical Office Simulation Software (MOSS) |
| 13-1 | Establishing the Appointment Matrix in a Paper System | 18-1 | Current Procedural Terminology Coding | 22-1 | Medical Asepsis Hand Wash (Hand Hygiene) |
| 13-2 | Establishing the Appointment Matrix Using Medical Office Simulation Software (MOSS) | 18-2 | International Classification of Diseases, 9th Revision, Clinical Modification Coding | 22-2 | Removing Contaminated Gloves |
| 13-3 | Making an Appointment on the Telephone Using Paper Scheduling | 18-3 | Applying Third-Party Guidelines | 22-3 | Transmission-Based Precautions: Donning a Gown, Mask, Gloves, and Cap (Isolation Technique) |
| 13-4 | Making an Appointment on the Telephone Using Medical Office Simulation Software (MOSS) | 18-4 | Completing a Medicare CMS-1500 (08-05) Claim Form | 22-4 | Sanitization of Instruments |
| 13-5 | Checking in Patients in a Paper System | 19-1 | Recording/Posting Patient Charges, Payments, and Adjustments in a Manual System | 23-1 | Taking a Medical History for a Paper Medical Record |
| 13-6 | Checking in Patients Using Medical Office Simulation Software (MOSS) | 19-2 | Balancing Day Sheets in a Manual System | 24-1 | Measuring an Oral Temperature Using an Electronic Thermometer |
| 13-7 | Cancellation and Rescheduling Procedures Using Paper Scheduling | 19-3 | Posting Patient Charges Using Medical Office Simulation Software (MOSS) | 24-2 | Measuring an Aural Temperature Using a Tympanic Thermometer |
| 13-8 | Cancellation and Rescheduling in Medical Office Simulation Software (MOSS) | 19-4 | Insurance Billing Using Medical Office Simulation Software (MOSS) | 24-3 | Measuring a Temperature Using a Temporal Artery (TA) Thermometer |
| 13-9 | Scheduling Inpatient and Outpatient Admissions and Procedures | 19-5 | Posting Payments and Adjustments Using Medical Office Simulation Software (MOSS) | 24-4 | Measuring a Rectal Temperature Using a Digital Thermometer |
| 14-1 | Establishing a Paper Medical Chart for a New Patient | | | 24-5 | Measuring an Axillary Temperature |
| 14-2 | Establishing an Electronic Medical Record for a New Patient Using Medical Office Simulation Software (MOSS) | | | | |

24-6	Measuring an Oral Temperature Using a Disposable Oral Strip Thermometer	30-16	Administer Oxygen by Nasal Cannula for Minor Respiratory Distress	35-1	Proper Disposal of Drugs
24-7	Measuring a Radial Pulse	30-17	Instructing Patient in Use of Metered Dose Inhaler	36-1	Administration of Oral Medications
24-8	Taking an Apical Pulse	30-18	Spirometry	36-2	Withdrawing Medication from a Vial
24-9	Measuring the Respiration Rate	30-19	Pulse Oximetry	36-3	Withdrawing Medication from an Ampule
24-10	Measuring Blood Pressure	30-20	Assisting with Plaster Cast Application	36-4	Administration of Subcutaneous, Intramuscular, and Intradermal Injections
24-11	Measuring Height	30-21	Assisting with Cast Removal	36-5	Administering a Subcutaneous Injection
24-12	Measuring Adult Weight	30-22	Assisting the Physician during a Lumbar Puncture or Cerebrospinal Fluid Aspiration	36-6	Administering an Intramuscular Injection
25-1	Assisting with a Complete Physical Examination	30-23	Assisting the Provider with a Neurologic Screening Examination	36-7	Administering an Intradermal Injection of Purified Protein Derivative (PPD)
26-1	Assisting with Routine Prenatal Visits	31-1	Applying Sterile Gloves	36-8	Reconstituting a Powder Medication for Administration
26-2	Assisting with Pelvic Examination and Pap Test (Conventional and ThinPrep® Methods)	31-2	Chemical “Cold” Sterilization of Endoscopes	36-9	Z-Track Intramuscular Injection Technique
26-3	Assisting with Insertion of an Intrauterine Device (IUD)	31-3	Preparing Instruments for Sterilization in Autoclave	37-1	Perform Single-Channel or Multichannel Electrocardiogram
26-4	Wet Prep/Wet Mount and Potassium Hydroxide (KOH) Prep	31-4	Sterilization of Instruments (Autoclave)	37-2	Holter Monitor Application (Cassette and Digital)
26-5	Amplified DNA ProbeTec Test for Chlamydia and Gonorrhea	31-5	Setting Up and Covering a Sterile Field	39-1	Using the Microscope
27-1	Administration of a Vaccine	31-6	Opening Sterile Packages of Instruments and Supplies and Applying Them to a Sterile Field	40-1	Palpating a Vein and Preparing a Patient for Venipuncture
27-2	Maintaining Immunization Records	31-7	Pouring a Sterile Solution into a Cup on a Sterile Field	40-2	Venipuncture by Syringe
27-3	Measuring the Infant: Weight, Length, and Head and Chest Circumference	31-8	Assisting with Office/Ambulatory Surgery	40-3	Venipuncture by Vacuum Tube System
27-4	Taking an Infant’s Rectal Temperature with a Digital Thermometer	31-9	Dressing Change	40-4	Venipuncture by Butterfly Needle System
27-5	Taking an Apical Pulse on an Infant	31-10	Wound Irrigation	40-5	Capillary Puncture
27-6	Measuring Infant’s Respiratory Rate	31-11	Preparation of Patient’s Skin before Surgery	40-6	Obtaining a Capillary Specimen for Transport Using a Microtainer Transport Unit
27-7	Obtaining a Urine Specimen from an Infant or Young Child	31-12	Suturing of Laceration or Incision Repair	40-7	Obtaining Blood for Blood Culture
28-1	Instructing Patient in Testicular Self-Examination	31-13	Sebaceous Cyst Excision	41-1	Hemoglobin Determination Using a CLIA Waived Hemoglobin Analyzer
30-1	Urinary Catheterization of a Female Patient	31-14	Incision and Drainage of Localized Infection	41-2	Microhematocrit Determination
30-2	Urinary Catheterization of a Male Patient	31-15	Aspiration of Joint Fluid	41-3	Erythrocyte Sedimentation Rate
30-3	Fecal Occult Blood Test	31-16	Hemorrhoid Thrombectomy	41-4	Prothrombin Time (Using CLIA Waived ProTime Analyzer)
30-4	Performing Visual Acuity Testing Using a Snellen Chart	31-17	Suture/Staple Removal	42-1	Assessing Urine Volume, Color, and Clarity
30-5	Measuring Near Visual Acuity	31-18	Application of Sterile Adhesive Skin Closure Strips	42-2	Using the Refractometer to Measure Specific Gravity
30-6	Testing Color Vision Using the Ishihara Plates	33-1	Transferring Patient from Wheelchair to Examination Table	42-3	Performing a Urinalysis Chemical Examination
30-7	Performing Eye Instillation	33-2	Transferring Patient from Examination Table to Wheelchair	42-4	Preparing Slide for Microscopic Examination of Urine Sediment
30-8	Performing Eye Patch Dressing Application	33-3	Assisting the Patient to Stand and Walk	42-5	Performing a Complete Urinalysis
30-9	Performing Eye Irrigation	33-4	Care of the Falling Patient	42-6	Utilizing a Urine Transport System for C&S
30-10	Assisting with Audiometry	33-5	Assisting a Patient to Ambulate with a Walker	42-7	Instructing a Patient in the Collection of a Clean-Catch, Midstream Urine Specimen
30-11	Performing Ear Irrigation	33-6	Teaching the Patient to Ambulate with Crutches	43-1	Procedure for Obtaining a Throat Specimen for Culture
