This one-stop lecture and class presentation tool makes it easy to incorporate high-resolution images into your lectures. With this powerful tool, you can assemble, edit, and present customized lectures either in an easy-to-use Microsoft® PowerPoint® presentation format or in individual file formats compatible with other image-viewing software. Available on your choice of DVD or multiple CD-ROMs, the **Digital Image Library** provides:

- High-resolution images—maps, diagrams, and most of the fine art images from the text—are linked to specific figures for every chapter in *Gardner's Art through the Ages*.
- NEW! A zoom feature enables you to magnify selected portions of an image for more detailed display in class.
- NEW! The handy compare-and-contrast feature allows you to display images side by side so students can more easily focus on similarities and differences.
- Easy to customize! You can personalize the library, adding your own images to those from the text.
- A Google™ Earth application with more than 250 coordinates enables you to zoom in on entire cities, as well as on key monuments and buildings.
- Video clips of architectural landmarks in New York City discussed in the text are also included. These can be navigated through as you wish—and zoomed in and out.
